Founded in 1968, Etap Plastik has been **a leading brand in the sector for over 55 years,** with products that are extensively used in multiple sectors, from beverages to food, from agriculture to heavy industry.

Etap Plastik, a subsidiary company of Özgörkey Holding, serves several industrial branches with its extensive range of products. The company produces its highly demanded products, such as:

- agricultural crates
- dairy crates,
- bakery crates,
- beverage crates with separators,
- industrial cases,
- conical cases,
- VDA-KLT industrial cases
- dangerous goods transportation crates
- chain market cases
- foldable crates,
- general purpose or one-way plastic pallets,
- plastic shelf pallets,
- coil transport pallets,
- big boxes, vessels, and collapsible containers

to high-quality standards with international certificates of conformity.

Our priority at Etap Plastik is
**to be the perfect sustainable
strategic solution partner for
our stakeholders.**

We act on decision-making mechanisms based on reliable data, effective implementation, and efficient control systems to fully meet our customers' needs. We operate according to the principles of the circular economy and strive to operate responsibly and transparently.

- 22,000 m² facility
- 9,000 m² indoor area
- 10,000 tons/year production volume
- Exporting 30% of its production
- Sales to over 30 countries on 4 continents

WORKING DILIGENTLY
FOR A SUSTAINABLE
FUTURE

Improving our sustainability performance is
one of our top priorities as Etap Plastik.
Our greatest motivation in this regard is
to be the solution partner to brands striving
to reduce their environmental impact.

We are at your side to help you achieve your
sustainability goals with the strength that
our corporate values give us.

CARING FOR OUR BUSINESS

We work diligently to create

excellent customer satisfaction
with our entire knowledge, skills, experience, talents, and competencies.

CARING FOR OUR PEOPLE

We are a strong team with common priorities,
sharing rights and responsibilities,
and acting together in high dexterity.

CARING FOR THE ENVIRONMENT

We consider the impact of our activities on nature
with utmost care and we carefully plan
the steps taken to reduce our carbon footprint.

CARING FOR THE FUTURE

We work to leave a better world for future generations
by taking the initiative to find solutions.

WE BELIEVE IN COOPERATIVE DEVELOPMENT

For a sustainable life, we share common goals with both local and global business partners, develop projects together, and grow and strengthen together.

As Etap Plastik, we are actively involved in various platforms in both sector-related organizations and in different fields such as environment, economy, and gender equality.

- UN Global Compact Türkiye "Global Compact Signatories Association"
- UN Women's Empowerment Platform
- Aegean Regional Chamber of Industry and Commerce
- Izmir Chamber of Commerce
- Aegean Exporters' Association
- Plastic Industrialists Association (PAGDER)
- Turkish Industry and Business Association

WE PROTECT, STORE, AND TRANSPORT YOUR PRODUCTS SECURELY

We are the choice of many national and international brands in the food, agriculture, retail, automotive, industrial, and logistics sectors with our durable, recyclable, reusable, and high-quality products.

Our plastic crates, pallets, and large-volume containers, which we produce using injection molding technology, safely store, protect, and transport products.

The primary goal of our company, which has been operating with the understanding of high customer satisfaction since its establishment in 1968, is to be the sustainable strategic solution partner of our stakeholders.

CRATES

We are committed
to helping consumers
contribute to a
greener future and
**empowering them
to make sustainable
choices.**

We know that recycling is a shared responsibility for consumers, producers, and ourselves. Through our sustainability efforts, we are developing alternatives for plastic crates and pallets that have reached the end of their useful life to remain in the value chain and become part of the circular economy. While trying to raise awareness, we develop ourselves and our product options to ensure that our products are recyclable, reusable, and made from recycled raw materials.

SUSTAINABLE PRODUCTS

Aligned with our corporate goal to become a leading strategic stakeholder in sustainability;

- Recyclable plastics,
- bioplastics,
- circular economy models that can be adapted to the supply chain

are the areas we focus on.

"

We have a significant share, especially in the production of mechanically **recycled polypropylene and polyethylene**.

We also offer our stakeholders several sustainable options with our bioplastic product alternatives. Bio-based plastics are plastics made from renewable resources. Plant resources such as starch and legume waste, which have no function in the food chain, are the main raw materials for bioplastics. On the other hand, the use of chemically produced versions made from waste industrial oils and used cooking oils is also on the agenda. These plastics reduce dependence on fossil fuels and significantly contribute to the use of agricultural waste.

Since bio-based plastics do not degrade naturally in nature, they are included in the recycling value chain in accordance with circular economy models. In line with our customers' requirements, we produce conical crates with 40% bio-based PP blend raw material. The quality, durability, and environmental impact evaluations of our products, which were produced for serial testing, were also successfully completed.

We are also working on innovative projects for the production of crates with PP blend raw material containing rice husks.

We evaluate the principles of circular economy in every product we produce and set every potential solution as our goal.

**As We Get Greener,
We Reshape The Future
Together**

2023 was a year in which Özgörkey Holding and Etap Plastik took major steps towards sustainability. Our transformation was the starting point of a major change that reached our corporate identity when we became one of the signatories of the United Nations Global Climate Compact.

At this stage, we have reached the point where we have published the first sustainability report as Özgörkey Holding and its companies.
